

HDPE EX4 (GM 9455F) High Density P

Product Description

“EX4 (GM 9455F)” is high density polyethylene with Butene-1 as comonomer. It is high molar mass for blown film with very high stiffness and good tenacity.

Stabilization: Ca-Stearate, Zn-Stearate, Irgafos168

Applications

- Paper like film suitable for wrapping.
- Counter bags and carrier bags.

Producer

Amir Kabir Petrochemical Company
