Main application & Characteristics

HD5050UA is an ultra-violet light stabilised high density polyethylene copolymer grade with a narrow molecular weight distribution, specially developed for injection moulding applications where a good resistance to environmental stress cracking is required.

Š Characteristics

- Good environmental stress cracking resistance.
- High impact resistance, especially at low temperatures.
- Good weathering resistance.

Š Typical applications are:

- Large dustbins & pails.
- Pallet boxes.

- Caps & closures.
- Fish crates.
- Technical parts.

* **HD5050EA** is not suitable for organoleptic applications.
